## Relevant Experience

### Full Stack Developer @ SMITIV GO PTE LTD

Dec 2022 - Jan 2025 // Lebar Square, Singapore (Remote)

- » Designed and built responsive, user-friendly web and mobile applications using modern frameworks like React, React Native, for the front end and NestJs, .Net6, for the back end.
- » Created robust and scalable server-side logic, APIs, to handle complex business processes and integrations with external systems.
- » Automated CI/CD pipelines using tools like, GitHub Actions, or Docker, and deployed applications to cloud platforms like AWS, or Google Cloud.

### Web & Mobile Developer @ Boldswitch Software

Sept 2022 - Dec 2022 // Kubwa, Abuja

- » Built responsive web applications using React and mobile applications with React Native for both iOS and Android platforms.
- » Led the complete software development lifecycle, including requirement gathering, design, development, testing, and deployment.
- » Managed deployments to cloud services (AWS, Azure, or Google Cloud) and app stores (Google Play Store and Apple App Store), ensuring post-launch monitoring and updates.

### React Native & Flutter Mobile Dev Intern @ Dweller Home

Jan 2022 - Aug 2022 // Lugbe, Abuja

- » Built and maintained responsive, high-performance mobile applications using React Native and Flutter for both Android and iOS platforms.
- » Translated Figma Designs into functional, pixel-perfect mobile interfaces, ensuring responsiveness across various screen sizes.
- » Worked closely with designers, backend developers, and project managers to deliver projects on time, ensuring alignment with business goals.
- » Utilized state management tools like Redux, Bloc, or Provider to handle complex app states and ensure a seamless user experience.
- » Assisted in publishing applications to Google Play Store and Apple App Store, ensuring compliance with platform guidelines.

### Front-End Web Developer @ Freelancer Upwork [↗](#)

Jan 2021 - Present // Remote

- » Developed responsive web designs from Adobe XD, Figma to React App, Webflow and Wordpress
- » Optimize web pages to improve Google Page Speed, GT Matrix
- » Automating flows using Zappier to transfer data from Webflow to Memberstack, Airtables, Hubspot etc
- » Kept close communication with client about specific needs everyday
